Challenge the ordinary

Durability

Durability characteristics equivalent to Class 3 of UNE-335 Standards.

Versatility

Its finishing options, lightness, ease of machining and dimensional stability means it adapts to an array of applications.

Quality

The properties of our panels remain unchanged even after sanding and machining.

Guarantee

15 year quality guarantee against delamination and fungal and xylophague insect attack.

+Info www.duraply.one

Sustainability

Wood from fast-growing European plantations which are PEFC and FSC® certified.

Experience

Garnica has a 75-year history of innovation in the world of wood products.

Durable is a range of plywood panels that are modified using an innovative treatment which provides exceptional durability and makes them immune to the attacks of fungi and insects, even outdoors and in the most demanding climatic conditions.

Applications

Visit the www.duraply.one website and discover all of Durable's success stories in each application.

Construction

Excellent mechanical properties, CE2+ structural certification and exceptional durability even in the most adverse climatic conditions make Durable the perfect ally in any construction application.

Furniture

Durable is the ideal solution for the furniture industry because in addition to the beauty of its decorative faces with natural wood finishes and surface quality, it has exceptional lightness, ease of machining and dimensional stability.

Marine

The lightness and premium quality plies of these panels, along with the HPL finish option and their great durability in humid environments make Durable the ideal product for yachts, boats and other vessels.

Decoration

Garnica has the solution for your decorative projects in areas of humid conditions: Durable panels combine durability and beauty thanks to their natural wood decorative faces and varnish finish option.
